Statement of Suitability

Client	Alex Murphy	Adviser	Pat Adviser
Date	22 October 2026	Firm	Test Financial Ltd
Product	Allianz Vantage Non-Standard PRSA (A5)		

Your needs and objectives

You have told us that you wish to save for your retirement and plan to retire at age 65.

Your attitude to risk

Based on the risk profiling we carried out with you (Voyant risk questionnaire, 02/10/2026), your attitude to investment risk corresponds to a risk rating of 3 (Low to Medium) on the 1 to 7 ESMA risk scale.

Your sustainability preferences

You told us that you have sustainability preferences. All of the recommended funds are classified under Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR), which means they promote environmental or social characteristics.

Our recommendation

We recommend the Allianz Vantage Non-Standard PRSA (A5), with a transfer value of €20,000, a single contribution of €50,000 and regular contributions of €500 a month, invested in the Life Cycle strategy (Opportunity glidepath). This strategy's target risk profile is Opportunity. As a glidepath, its fund mix changes gradually as you approach retirement, so no single ESMA rating is published for it. Based on the weighted average of its funds' ESMA ratings, its indicative risk is about 5 at the start of your plan, reducing to about 4 by your retirement age. This is higher than your assessed attitude to risk. We have recommended it because: The client has a long term to retirement and other cautious assets.

Why we believe this is suitable for you

- A PRSA allows you to save for retirement in a tax-efficient way, with tax relief on contributions within Revenue limits.

Transfer of your existing pension

You are transferring €20,000 from your existing pension arrangement into this PRSA.

Charges and remuneration

The total effect of the charges on your plan is equivalent to reducing the assumed growth rate by 1.85% per annum. We will receive initial remuneration of €3,650 and trail remuneration of 0.25% a year of your fund value, paid by Allianz Global Life from its charges. Full details are set out in the Charges section and the Remuneration Statement in this pack.

Risks you should be aware of

The value of your PRSA may go down as well as up and is not guaranteed. The benefits you receive will depend on the contributions paid, investment performance, charges and annuity rates at retirement.

Alternatives considered

The client wants to retire with an income of 60% of salary.

I confirm that this Statement of Suitability reflects the advice given to the client.

Adviser: Pat Adviser

Date

Each fund has a published ESMA risk rating from 1 (lower risk, typically lower rewards) to 7 (higher risk, typically higher rewards). Your own risk rating comes from the risk profiling your adviser carried out with you, and is compared below with the indicative risk of your portfolio. Glidepath strategies change their fund mix as you approach retirement, so they are matched to you on their risk profile instead.

Indicative risk about 5 at the start of your plan, reducing to about 4 by your retirement age.*

This strategy's risk profile (Opportunity) is higher than the profile suited to your assessed attitude to risk (Low to Medium). Your adviser has recorded the reason for this recommendation: The client has a long term to retirement and other cautious assets.

* Indicative risk is the allocation-weighted average of the published ESMA ratings of the funds in the strategy (5.0 at the start of your plan and 4.2 at retirement), rounded to the nearest whole number. It is a guide only and is not an official ESMA risk rating.
