What Allianz Global Life can do for you

The Allianz Brand

Allianz is a name recognised for its strength, stability and global standing. Built on 135 years of excellence, it reflects a heritage of consistency, resilience and ambition that continues to shape our business today.

At Allianz Global Life, we believe strong relationships are built on fairness, transparency and collaboration. By fostering openness and accountability, we help create an environment in which businesses can grow on solid foundations and with a clear sense of purpose.

Our role extends beyond delivering financial solutions. We are focused on protecting customers, creating lasting value for stakeholders, and attracting the talent that drives innovation, performance and long-term success.

This commitment is reflected in the standards we set, the way we work, and the quality we seek to deliver across every aspect of our business. It underpins our approach and helps ensure that everything we do is guided by integrity, discipline and a long-term perspective.

For intermediaries, this means working with a brand that is established, dependable and committed to doing business in the right way. It is this foundation of strength, consistency and trust that continues to set Allianz apart in a competitive market.

Five reasons to recommend Allianz Vantage

What makes Allianz Vantage a smart choice for your clients? Here are five key differentiators.

1. We are part of **the Allianz Group**, one of the world's leading insurers and asset managers with over 156,000 employees worldwide, serving 97 million* private and corporate customers across nearly 70 countries.
2. We pride ourselves on our financial strength, ensuring our ability to guarantee our products with confidence. Our impressive solvency ratio of 225% as at the end of June 2026 is a statement to our robust financial position.
3. Built for today's advisor. Our Customer and Advisor Portals streamline applications, policy management and servicing, helping you support clients with greater speed and efficiency.
4. Built on innovation and designed around your clients. Allianz Vantage offers the flexibility of multiple investment approaches, with the added option of our unique annual guarantee.
5. Trust and clarity. Transparent product features, fund charges and performance reporting give advisers and clients the clarity and confidence to make informed decisions.

*Customer count reflects Allianz customers in consolidated entities that are part of the customer reporting scope only
Update: May 7, 2026 (Annual Report 2025)

Allianz Vantage Personal Retirement Savings Account (PRSA)

We secure your future.

Allianz Vantage PRSAs are designed to help save for retirement and the future.

Choose different investment strategies based on client circumstances

Adapt their investment strategy as needs change

Access active, passive and protected investment solutions through a carefully selected fund range

Help them protect their loved ones with insurance coverage in case of death

Which Allianz Vantage PRSA is the right choice for your clients?

The name Vantage was chosen to highlight the advantage it offers your clients, giving them control and flexibility over their investments while benefiting from the security of an annual guarantee.

Allianz Vantage pension products are flexible enough to support the different goals your clients may have beyond their working lives.

With a new and unique annual guarantee, Allianz Vantage gives customers the ability to protect their retirement pot against market downturns while remaining open to growth.

In simple terms, Allianz Vantage offers clients confidence, flexibility and a more secure, growth-oriented retirement option.

We know clients have different needs, which is why we offer two distinct PRSA options to help meet their retirement goals. Whether they want a simple, low-maintenance plan or a more tailored approach with a wider range of investments, there is an Allianz Vantage PRSA to suit them.

Our PRSA options combine flexibility and security. Each one is designed to adapt to changing needs while providing peace of mind, helping clients build a retirement fund that reflects their individual circumstances and financial aspirations.

Allianz Vantage Standard PRSA

The following questions will help you to define the Primary Target Market for our Allianz Vantage Standard PRSA.

- Are they seeking a tax-efficient way to save for retirement, with options to transition to an annuity or an Approved Retirement Fund (ARF) upon their retirement?
- Do they have a lump sum to invest and/or wish to make regular contributions, either themselves and/or through their employer, towards their retirement savings?
- Are they interested in having a retirement savings product in addition to, or instead of, an employer provided pension?
- Would they like the possibility of receiving a tax-free lump sum when they reach their retirement age?

Primary Target Market

Allianz Vantage Standard PRSA is designed for customers seeking a tax-efficient way to save for retirement, with the option at retirement to transfer to an annuity or an Approved Retirement Fund (ARF).

It is intended for customers who:

- have a lump sum to invest and/or want to make regular contributions, personally and/or through their employer
- want a retirement savings product in addition to, or instead of, an employer-provided pension
- would like the option of a tax-free lump sum at retirement age

Key Product Features

Tax-efficient retirement savings

A tax-efficient way to build retirement savings, with contributions qualifying for tax relief. At retirement age, funds can transfer to a designated retirement product to support long-term financial goals.

Seamless transfers

Switching and transfer options to and from other PRSAs, giving clients flexibility and control as their retirement savings needs change over time.

Default investment strategy

Designed to guide clients towards retirement in line with their chosen and agreed risk profile at the start of the policy. The default strategy is the medium-risk Allianz LifeCycle on its Strategy Select funds.

Allianz Vantage Non-Standard PRSA

The following questions help you to define the Primary Target Market for our Allianz Vantage Non-Standard PRSA.

- Are they looking to save for retirement in a tax-efficient way, with options to transition to an annuity or an Approved Retirement Fund (ARF) when it's time to draw down?
- Do they have a lump sum to invest and/or would like to make regular contributions toward their retirement savings?
- Are they looking for access to a variety of investment funds with varying levels of risk exposure?
- Are they investing with medium- to long-term goals in mind?
- Are they interested in a retirement savings plan that could complement or replace an employer-provided pension?
- Would they like the option of a tax-free lump sum when they reach retirement?

Primary Target Market

We have designed Allianz Vantage Non-Standard PRSA for customers who answer "yes" to the previous questions.

Key Product Features

Key product features of the Allianz Vantage Non-Standard PRSA product are:

- This retirement savings product offers your clients a tax-efficient way to build their pension, with contributions qualifying for tax relief. At their chosen retirement age, funds can seamlessly transfer to a designated retirement product, providing a flexible and secure solution to meet their long-term financial planning needs.
- It provides both guaranteed and non-guaranteed investment options, offering clients a flexible and diversified approach to managing their financial goals within a single umbrella policy.
- It allows seamless switches and transfers to and from other PRSAs, providing clients with flexibility and control over their retirement savings as their needs evolve.
- The Default Investment Strategy consists of the medium-risk Lifecycle until 8 years before the chosen retirement age, followed by the medium risk AutoPilot until the policyholder's retirement, ensuring a balanced approach. Further information on the Default Investment Strategy are detailed in the Investment Options section.
- Policyholders can switch from a non-guaranteed fund to a guaranteed fund at any point during the policy year, providing added flexibility. The guarantee begins on the switch date and remains in place until the next policy anniversary, offering a secure investment option for this period.

PRSA Details

PRSAs	There are two types of PRSAs: **Standard PRSA:** Charges are capped at **1% of the fund value per year and 5% of each contribution**. Investment options are limited to simpler, lower-risk funds. **Non-Standard PRSA:** No cap on charges (fees may be higher). Offers a wider range of investment options including higher risk funds.
Contribution Type:	Single Contribution, Regular Contribution and Top ups allowed
Minimum Contribution:	Minimum investment amount for single and recurrent contribution: • €300 per annum
Maximum Contribution Limits	Maximum PRSA Contribution Limits: • Revenue allows income-tax relief on personal PRSA contribution up to the following age-based limits, on earnings up to €115,000:

Age	Under 30	30-39	40-49	50-54	55-59	60+
Limit	15%	20%	25%	30%	35%	40%

Regular Contribution payment frequency:	Monthly, quarterly or annually
Regular Contribution payment options:	Direct Debit via customer's bank account & Payroll Deduction (Employer and/or Employee contributions)
Age Limits	• Minimum entry age is 18 years of age, and a maximum of 75
Fund Options	• Policyholder can choose from a variety of 13 different funds for Non-Standard PRSA and up to 8 in the Standard PRSA
Accessing PRSA at retirement	PRSA benefits can be accessed from the age of 60 (or potentially earlier under certain circumstances). At retirement, there are several options for your client: • Take up to **25% of the fund as a tax-free lump sum.** Use the remaining balance to: • Purchase an **Annuity** (a guaranteed income for life). • Transfer to an **Approved Retirement Fund (ARF) or a vested PRSA** for more flexible withdrawals. • Take the balance as taxable cash (subject to income tax, USC, and PRSI if applicable).
Guaranteed Options	**Strategy Select 30** (guarantee level 93%) **Strategy Select 50** (guarantee level 90%) **Strategy Select 75** (guarantee level 85%)
Fund Switches	• From without guarantee to without guarantee: Allowed anytime • From without guarantee to guaranteed: Allowed anytime (guarantee applies at next anniversary) • From guaranteed to without guarantee: Allowed at specific times* • From guaranteed to guaranteed: Can be requested anytime but takes effect only at the next policy anniversary

* The client has two timing options: 1) Guarantee ends on the last pricing day of the month after the request is received. 2) Guarantee ends on the next policy anniversary.

We also offer AVC (Additional Voluntary Contribution) options for clients both in our Standard and Non-Standard PRSAs products.

Allianz Vantage AVC Standard PRSA

The following questions help you to define the Primary Target Market for our Allianz Vantage AVC Standard PRSA.

- Is your client an employee or member of an employer pension scheme seeking greater control and transparency over additional retirement contributions?
- Are they looking for the flexibility to top up retirement savings in a tax-efficient way through regular payments, lump sums, or both, on their own terms?
- Are they seeking a retirement savings option that allows investment over the medium to long term, with access to a range of investment funds?
- Are they looking for an AVC solution that remains portable, even if they change jobs or leave their employer's pension scheme?

Allianz Vantage AVC Non-Standard PRSA

If your client wants more from their AVC PRSA and their answer to this additional question is 'yes', then the Allianz Vantage AVC Non-Standard PRSA may be the ideal choice for their retirement planning needs.

- Are they seeking access to a variety of investment funds with different levels of equity and fixed interest exposure.

If the answer to these questions is 'yes', then the Allianz Vantage AVC PRSA suite of products may be an ideal choice in helping clients secure a brighter future.

Additional Important Information

AVC PRSA Contribution Limits by Age:

The amount your client can contribute each year across all of their personal pension contributions, including their PRSA, AVC PRSA, and any employee contributions to their occupational pension scheme, while still receiving tax relief as follows below:

These limits apply to the combined total of:

Age	Under 30	30-39	40-49	50-54	55-59	60+
Limit	15%	20%	25%	30%	35%	40%

- PRSA contributions
- AVC PRSA contributions
- Employee contributions to your employer's scheme

The maximum earnings considered for tax relief purposes is €115,000 per year.

AVC PRSAs are linked to an Occupational Pension Scheme:

- An AVC PRSA is designed specifically for people who are already members of an occupational pension scheme and want to make additional contributions to maximise their retirement benefits.
- This means that your client can only open and use an AVC PRSA if they are actively participating in an employer pension scheme.
- AVC PRSAs are always funded by the employee only, employers do not contribute to AVC PRSAs.

Benefits Follow Your Occupational Scheme Rules:

- Your client's retirement age is set by their employer's scheme. so their AVC PRSA becomes accessible only when they draw their occupational pension benefits.
- You client's lump sum and income options must also match the scheme's rules.
- If your client leaves their current employment, their AVC benefits will follow the retirement rules of their current occupational pension scheme unless Revenue rules allow otherwise.

Charges & Fees:

- Applicable fees and charging structures (contribution charges, management fees) apply specifically to the AVC PRSA product and are not linked to the charges within your client's occupational pension scheme.

Warning: Allianz Vantage PRSA is not a risk free product.

Warning: The value of your investment may go down as well as up.

Warning: If you invest in this product you may lose some or all of the money you invest.

Warning: The income you get from this investment may go down as well as up.

Warning: These products may be affected by changes in currency exchange rates.

Warning: If you invest in this product you will not have access to your money until you retire.

Investment choices designed around your clients' needs

A market-leading and carefully selected range

Broad enough to meet different client objectives, compact enough to be easy to explain.

Allianz Global Life offers a carefully selected range of investment solutions designed to meet a wide variety of client needs. From actively managed multi-asset portfolios and protected investment solutions to passive index tracking strategies and lifecycle approaches, advisors can build investment solutions aligned to individual objectives, risk tolerance and retirement goals.

Five ways to support client outcomes

Organised around advisor conversations rather than simply listing funds.

Multi-Asset Solutions - Actively Managed

Allianz Dynamic Multi Asset Strategy SRI 15 / 50 / 75

Professionally managed multi-asset portfolios for clients seeking diversified medium- to long-term growth.

Protected Growth - Actively Managed

Strategy Select 30 / 50 / 75

Multi-Asset funds with target volatility and an optional annual guarantee for more risk conscious clients.

Complementary Building Blocks - Actively Managed

Equity, bond, short-duration and cash options

Focused components for advisors constructing tailored solutions or complementing existing portfolios.

Index-Tracking - Passively Managed

HSBC MSCI World, S&P 500 and Euro Stoxx 50 ETFs

Efficient index-tracking exposure to major equity markets for cost-conscious clients.

Lifecycle & Autopilot Pathways

Investment journeys that evolve through time

Asset allocation that can adapt as clients approach retirement and their needs change.

Simple range. Clear client outcomes. Allianz investment expertise.

Investment options

Protected Growth

Unique annual guarantee

Here is some more information on our optional annual guarantee.

Allianz Vantage offers a unique feature: an optional annual guarantee.

The guarantee is applied individually within each policy, rather than within the fund itself and **it is a percentage (up to 93%) of the policy value as calculated at the policy anniversary**. This approach enables us to deliver capital value directly to clients by topping up their policy when the guarantee is triggered.

When markets are down and the value of policy units falls below the level of the guarantee, the policy will receive additional units at the policy anniversary, as a result of this protective feature. This boosts the policy value immediately.

When markets perform well, the guaranteed amount increases at the next policy anniversary in line with market growth. The guaranteed value for a year is set at each policy anniversary, and it is a percentage of the last policy anniversary value.

If the annual guarantee is active:

- The policy can be invested in more than one fund.
- The death benefit is the max value between the guaranteed value and policy value.
- Any surrender or transfer out is NOT guaranteed, unless taken exactly at policy anniversary.
- Switches are allowed where the fund has a guarantee to: i. a fund "with guarantee" - 100% of the invested amount in that fund must be switched, no partial switches are allowed, or ii. to a fund "without guarantee" – 100% of the invested amount in that fund, no partial switches are allowed.
- Any top up or regular contribution has the guarantee applied immediately at individual contribution level, and is consolidated at policy anniversary.

Allianz Guarantee options vs Constant Proportion Portfolio Insurance (CPPI) funds

	Allianz Guarantee Options	CPPI Funds
Guarantee Structure	Guarantee is offered at individual level. The guaranteed value is customised at policy level and is reset at each anniversary date.	Guarantee is offered at fund level. Different investors will have different levels of protection from the guarantee depending on when they invest in the fund.
Asset Allocation Strategy	Asset allocation is independent of guarantee. Maintains exposure to target level of risky assets regardless of guarantee level.	Adjust asset allocation based on proximity to guarantee. Reduce risky assets as it approaches the guarantee level.
Risk of Cash Lock*	No Cash Lock Risk. Maintains potential for returns regardless of proximity to guarantee.	CPPI funds are exposed to Cash Lock **Risk:** Significantly reduces future return potential.
Guarantee Provider	Guarantee is backed by Allianz Global Life, part of Allianz Group(S&P Rating: AA**; Moody's Rating: Aa2**).	Guarantee backed by third parties. Potential credit default risk.

* Cash Lock refers to a situation where the fund's assets become predominantly invested in cash over time. This occurs when the fund's value continuously declines, prompting the strategy to disinvest from risky assets and move into cash to protect the floor value (the minimum guaranteed return). As a result, the fund becomes heavily invested in cash, making it difficult for the strategy to generate subsequent gains, especially in low-interest-rate environments. This phenomenon is considered a major drawback of CPPI strategies, as it can lead to underperformance and limit the potential for future growth.

** as at 31/12/2025

LifeCycle and Autopilot Pathways

Allianz LifeCycle

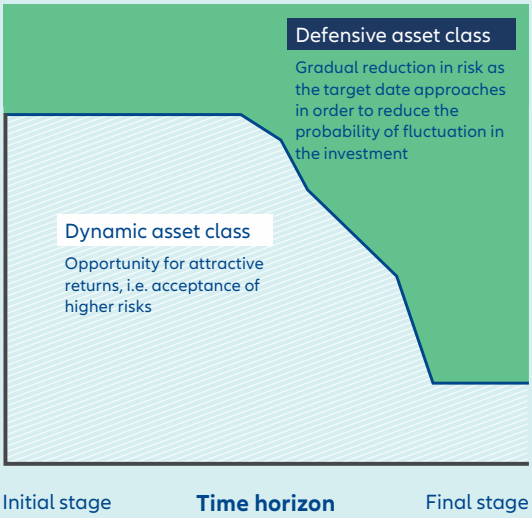

Tailored investment strategies for a secure retirement
Three options to match your Clients' needs: Allianz Global Investors has designed three distinct Allianz Lifecycle options—Balanced, Dynamic, and Opportunity—to cater to the changing investment needs of retirement savers. Each strategy is applied at policy level and it is, therefore, tailored to your client's individual risk appetite.

How they work: These strategies begin with a higher equity content earlier in the lifecycle, reducing it as retirement approaches. This approach is designed to optimize returns while mitigating risk as your clients get closer to their retirement goals.

Consistent review, minimal effort: With Allianz Lifecycle, your clients' portfolios are consistently reviewed from a risk-return perspective. This ensures their investment objectives remain on track. Best of all, this approach requires minimal intervention from you or your clients, as all adjustments happen automatically.

Data-driven and professionally managed: Driven by data and managed by experienced professionals, Allianz Lifecycle offers a stable, emotion-free investment path. This provides peace of mind for both you and your clients.

Lifecycle path: how the investment portfolio changes over time

Allianz AutoPilot

In addition to the LifeCycle options, Allianz offers three AutoPilot strategies – low, medium, and high risk – to provide a tailored approach to retirement savings. These options combine the Allianz Strategy Select 30, 50, and 75 funds, with the Allianz Advanced Fixed Income Short Duration, Allianz Advanced Fixed Income Euro and Allianz Euro Cash funds, offering a dynamic asset mix throughout the policy.

Similar to the Lifecycle options, AutoPilot strategies reduce equity exposure as retirement nears, but with varying risk levels designed to suit different customer appetites. Their investment profile adapts based on individual risk tolerance, and time left until retirement, ensuring alignment with their evolving needs.

The Allianz AutoPilot options also include rolling one-year guarantees, with the guarantee percentage for the Allianz Strategy Select 30 Fund set at 93%, for the Allianz Strategy Select 50 Fund set at 90%, and for the Allianz Strategy Select 75 Fund set at 85%.

For customers who do not wish to follow the Default Investment Strategy, LifeCycle or AutoPilot strategies, they have the option of choosing any combination from the available fund range.

Default Investment Strategy & Fund Options - Allianz Vantage Standard PRSA

The Default Investment Strategy for the Allianz Vantage Standard PRSA combines Allianz Strategy Select 30 and 75 funds, following a medium risk investment strategy called the Dynamic Lifecycle Strategy. It invests more heavily in Select 75 with higher equity content earlier in the Lifecycle, gradually moving to Select 30 as retirement nears.

The fund proportions adjust monthly to align with the target allocation, gradually reducing equity exposure as retirement approaches. The table shows the expected equity and fixed income content, reflecting this shift over time.

Years to NRA	Allianz Strategy Select 75	Allianz Strategy Select 30	Approximate Expected Equity Exposure	Approximate Expected Fixed Income Exposure
13+	88.9%	11.1%	70.0%	30.0%
12	74.3%	25.7%	63.4%	36.6%
11	62.3%	37.7%	58.1%	41.9%
10	50.9%	49.1%	52.9%	47.1%
9	41.6%	58.4%	48.7%	51.3%
8	33.5%	66.5%	45.1%	54.9%
7	27.0%	73.0%	42.1%	57.9%
6	21.4%	78.6%	39.6%	60.4%
5	16.8%	83.2%	37.6%	62.4%
4	12.7%	87.3%	35.7%	64.3%
3	9.0%	91.0%	34.0%	66.0%
2	5.7%	94.3%	32.6%	67.4%
1	2.7%	97.3%	31.2%	68.8%
0	0%	100.0%	30.0%	70.0%

In addition to the Dynamic Lifecycle which comprises the Default Investment Strategy, policyholders who do not wish to invest in the Default Investment Strategy can choose from two other Lifecycle options – Balanced and Opportunity - which follow investment pathways designed by Allianz Global Investors to meet the evolving investment needs of retirement savers. Broadly speaking, these strategies incorporate asset mixes with higher equity contents further from retirement, reducing as retirement approaches, with each strategy differing to reflect the chosen risk appetite of the customer.

For customers who do not wish to follow the Default Investment Strategy or other Lifecycle strategies, they have the option of choosing any combination from the available fund range:

Fund
Allianz Strategy Select 30
Allianz Strategy Select 50
Allianz Strategy Select 75
Allianz Advanced Fixed Income Short Duration
Allianz Euro Cash

Default Investment Strategy & Fund Options - Allianz Vantage Non-Standard PRSA

The Default Investment Strategy for the Allianz Vantage Non-Standard PRSA has two periods based on the time remaining until retirement. With 8 years to go to retirement the policyholder enters the guarantee period. Prior to this the policyholder is in the non-guaranteed period. During the non-guaranteed period, the assets of the policy are invested in a combination of the following four funds:

- Allianz Dynamic Multi Asset Strategy SRI 15
- Allianz Dynamic Multi Asset Strategy SRI 75
- Allianz Best Styles Global Equity SRI
- Allianz Advanced Fixed Income Short Duration

During the non-guaranteed period, the fund proportions follow the table below, adjusting monthly to reach the target allocation. The table also shows the expected equity and fixed income content, with equity exposure gradually reducing as retirement approaches.

Years to NRA	Allianz Best Styles Global Equity SRI	Allianz Dynamic Multi-Asset SRI 75	Allianz Dynamic Multi-Asset SRI 15	Allianz Advanced Fixed Income short duration	Approximate Expected Equity Exposure	Approximate Expected Fixed Income Exposure
15+	69.2%	30.8%	0%	0%	92.3%	7.7%
14	55.8%	44.2%	0%	0%	89.0%	11.0%
13	8.6%	90.1%	1.3%	0%	76.4%	23.6%
12	0%	90.0%	10%	0%	69.0%	31.0%
11	0%	80.6%	19.4%	0%	63.4%	36.6%
10	0%	71.9%	26.6%	1.5%	57.9%	42.1%
9	0%	64.9%	32.3%	2.8%	53.5%	46.5%
8	0%	58.9%	36.5%	4.6%	49.7%	50.3%

The asset split shown here with 8 years to go is the expected position immediately before the commencement of the guarantee period.

When there are eight years to retirement, the Default Investment Strategy enters the guarantee period, with all assets within the Default Investment Strategy switched to the Allianz Strategy Select 50 Fund. Each year, a portion is moved to the Allianz Strategy Select 30 Fund, reaching 100% at retirement. This is shown in the table below.

Years to NRA	Allianz Strategy Select 50	Allianz Strategy Select 30	Approximate Expected Equity Exposure	Approximate Expected Fixed Income Exposure
8 (post switch)	100.0%	0%	50.0%	50.0%
7	87.5%	12.5%	47.5%	52.5%
6	75.0%	25.0%	45.0%	55.0%
5	62.5%	37.5%	42.5%	57.5%
4	50.0%	50.0%	40.0%	60.0%
3	37.5%	62.5%	37.5%	62.5%
2	25.0%	75.0%	35.0%	65.0%
1	12.5%	87.5%	32.5%	67.5%
0	0%	100.0%	30.0%	70.0%

During the guarantee period, a rolling one-year guarantee applies, starting 8 years before retirement. One year after the guarantee period begins, the value of the policy investing in the Allianz Strategy Select 50 Fund will be at least 90% of its value at the start of the guarantee period, adjusted for any withdrawals.

Each year, the guarantee rolls over. For example, 7 years from retirement, the value of the policy investing in the Allianz Strategy Select 50 Fund will be at least 90% of its value 8 years from retirement, excluding the impact of withdrawals or contributions. A similar guarantee applies to holdings in the Allianz Strategy Select 30 Fund, with a guarantee percentage of 93%.

As described above, where a guarantee applies, the total AMC is increased to incorporate a guarantee charge.

Where policyholders do not wish to invest in the Default Investment Strategy, a range of other options is available to them.

Our Asset Management partners

Our investment proposition combines the expertise of leading active and passive asset managers. Through Allianz Global Investors and HSBC Asset Management, clients can access actively managed multi-asset strategies, protected investment solutions with optional guarantees, focused equity and bond funds, low-cost index-tracking ETFs and lifecycle investment strategies.

ISIN: LU3068734824

Fund objectives

The fund invests in a broad range of asset classes with a particular focus on global equities and bonds. The fund management pursues a sustainable and responsible investment strategy ("SRI strategy"), which takes environmental, social and governance criteria into account. The fund's objective is to attain a return over the medium term that is comparable to the return of a portfolio consisting of 75% global stocks and 25% global bonds hedged to Euro. An integrated risk and volatility management will help to limit the volatility of the fund unit price to a pre-set range of 10-16% in the medium to long term.

Opportunities

- Above-average yield potential of stocks over the long term
- Focus on companies and institutions striving for sustainability
- Enhanced return potential through addition of emerging markets assets and high-yield bonds
- Comparably high stability of bonds with good credit quality
- Risk and stability management using volatility bandwidths and the value-at-risk method
- Currency gains against investor currency possible

Risks

- The volatility of fund unit prices may be increased
- Sustainability approach narrows the universe to eligible issuers
- Increased risk of price fluctuations and losses with stocks, emerging markets assets, and high-yield bonds
- Limited yield potential of bonds with good credit quality
- Risk and volatility management do not exclude potential losses
- Currency losses against investor currency possible

Allianz Dynamic Multi Asset Strategy SRI 50

ESMA Rating: 4
Investment Style: Active
Morningstar Rating*: ★★★★★
ISIN: LU3068734667

Fund objectives

The fund invests in a broad range of asset classes with a particular focus on global equities and bonds. The fund management pursues a sustainable and responsible investment strategy ("SRI strategy"), which takes environmental, social and governance criteria into account. The fund's objective is to attain a return over the medium term that is comparable to the return of a portfolio consisting of 50% global stocks and 50% global bonds hedged to Euro. An integrated risk and volatility management will help to limit the volatility of the fund unit price to a pre-set range of 6-12% in the medium to long term.

Opportunities

- Above-average yield potential of stocks over the long term
- Focus on companies and institutions striving for sustainability
- Enhanced return potential through addition of emerging markets assets and high-yield bonds
- Comparably high stability of bonds with good credit quality
- Risk and stability management using volatility bandwidths and the value-at-risk method
- Currency gains against investor currency possible

Risks

- The volatility of fund unit prices may be increased
- Sustainability approach narrows the universe to eligible issuers
- Increased risk of price fluctuations and losses with stocks, emerging markets assets, and high-yield bonds
- Limited yield potential of bonds with good credit quality
- Risk and volatility management do not exclude potential losses
- Currency losses against investor currency possible

Protected Growth

Allianz Dynamic Multi Asset Strategy SRI 15

ESMA Rating: 4
Investment Style: Active
Morningstar Rating*: ★★★★
ISIN: LU3068734238

Fund objectives

The fund invests in a broad range of asset classes with a particular focus on global equities and bonds. The fund management pursues a sustainable and responsible investment strategy ("SRI strategy"), which takes environmental, social and governance criteria into account. The fund's objective is to attain a return over the medium term that is comparable to the return of a portfolio consisting of 15% global stocks and 85% global bonds hedged to Euro. An integrated risk and volatility management will help to limit the volatility of the fund unit price to a pre-set range of 3-7% in the medium to long term.

Opportunities

- Comparably high stability of bonds with good credit quality
- Focus on companies and institutions striving for sustainability
- Enhanced return potential through addition of stocks, emerging markets assets, and high-yield bonds
- Risk and stability management using volatility bandwidths and the value-at-risk method
- Currency gains against investor currency possible

Risks

- Limited yield potential of bonds with good credit quality
- Sustainability approach narrows the universe to eligible issuers
- Increased risk of price fluctuations through addition of stocks, emerging markets assets, and high-yield bonds
- Risk and volatility management do not exclude potential losses
- Currency losses against investor currency possible

Allianz Strategy Select 75

ESMA Rating: 5
Investment Style: Active
Morningstar Rating*: ★★★★
ISIN: LU1462191526

Fund objectives

The fund invests to a variable extent in international equity markets and in the market for euro bonds. Applying a quantitative approach, fund management lowers the investment in stocks in phases of high market volatility and raises it in phases of low volatility. Overall, it strives to achieve a return that is comparable to the return of a mixed portfolio investing 75% in international stocks and 25% in medium-term EUR bonds.

Opportunities

- High return potential of stocks in the long run
- Steady interest income on bonds, capital gains opportunities on declining interest rates
- Broad diversification across numerous securities

Risks

- High volatility of stocks, losses possible. The fund unit price may be subject to increased volatility
- Interest rates vary, bonds suffer price declines on rising interest rates
- Limited participation in the yield potential of single securities

Complementary Building Blocks

Allianz Best Styles Global Equity SRI

ESMA Rating: 5
Investment Style: Active
Morningstar Rating*: ★★★★★
ISIN: LU2437558831

Fund objectives

The fund concentrates on the Global equity markets in accordance with the Sustainable and Responsible Investment Strategy (SRI Strategy). Depending on management's assessment of the market situation, it may utilise differing investment styles or combinations thereof. Up to 30% of the assets may be invested in Emerging Markets. Its investment objective is to attain capital growth over the long term.

Opportunities

- High return potential of stocks in the long run
- Investments specifically in the global equity markets and issuers with sustainable practices (SRI)
- Particular opportunities through "Best Styles approach"
- Broad diversification across numerous securities
- Possible extra returns through single security analysis and active management

Risks

- High volatility of stocks, losses possible. The volatility of fund unit prices may be strongly increased
- Underperformance of the global equity markets and from issuers with sustainable practices (SRI) possible
- Underperformance of "Best Styles" approach possible at times
- Limited participation in the yield potential of single securities
- Success of single security analysis and active management not guaranteed

Allianz Advanced Fixed Income Short Duration

ESMA Rating: 2
Investment Style: Active
Morningstar Rating*: ★★★
ISIN: LU1328247389

Fund objectives

The fund invests particularly in interest-bearing securities thus striving for an above-average long-term return compared to the European market for short duration bonds. The fund promotes investments that take into consideration environmental, social and corporate governance criteria. Up to 25% of the fund's assets may be invested in high-yield bonds provided that these have ratings between B- and BB+ (Standard & Poor's classification). The proportion of emerging market bonds is restricted to a maximum of 20%. Asset-backed securities/mortgage-backed securities (ABS/MBS) may not exceed 20% of fund assets and may only be acquired, if they carry an investment-grade rating. Foreign currency exposure exceeding 10% of the fund's volume needs to be hedged against euros.

Opportunities

- Interest income on bonds, capital gains opportunities on declining interest rates
- Particular price stability of short-term bonds
- Above-average yield potential of corporate, emerging market, and collateralized bonds
- Focus on sustainable investments
- Broad diversification across numerous securities
- Potential additional returns from single security analysis and active management

Risks

- Interest rates vary, bonds suffer price declines on rising interest rates
- Relatively low return potential of short-term bonds
- Addition of corporate, emerging market, and collateralized bonds increases risk of volatility
- Sustainability approach narrows the investment universe
- Limited participation in the potential of individual securities
- Success of single security analysis and active management not guaranteed

* as at 30/06/26

Complementary Building Blocks (continued)

Allianz Advanced Fixed Income Euro

ESMA Rating: 3
Investment Style: Active
Morningstar Rating*: ★★★★
ISIN: LU2190101332

Fund objectives

The fund invests particularly in interest-bearing securities thus striving for an above-average long-term return measured against the government bond market in the eurozone. The fund promotes investments that take into consideration environmental, social and corporate governance criteria. Up to 20% of the fund's assets may be invested in high-yield bonds. Emerging market bonds may also be acquired. The proportion of asset/mortgagebacked securities (ABS/MBS) is restricted to a maximum of 20%. Foreign currency exposure exceeding 20% of the fund's volume needs to be hedged against euros.

Opportunities

- Interest income on bonds, capital gains opportunities on declining interest rates
- Additional return potential of bonds from nongovernmental issuers
- Broad diversification across numerous securities
- Focus on sustainable investments
- Possible extra returns through single security analysis and active management
- Hedging of most foreign-currency exposure

Risks

- Interest rates vary, bonds suffer price declines on rising interest rates
- Bonds from non-governmental issuers entail higher risk of volatility and capital loss than public bonds
- Sustainability approach narrows the investment universe
- Limited participation in the yield potential of single securities
- Success of single security analysis and active management not guaranteed
- Limited currency influence possible

* as at 30/06/26

Allianz Euro Cash

ESMA Rating: 1
Investment Style: Active
ISIN: LU2575878199

Fund objectives

The objective of the investment policy is to achieve a money market-related return in line with the market, taking into account the security of the capital, value stability and simultaneous liquidity of the fund assets by investing in assets that have ecological or social characteristics in line with the strategy for sustainable and responsible investments (SRI strategy). Further information on the investment strategy, the permissible asset classes and the sustainability approach can be found in the sales prospectus.

Opportunities

- Money market-related yields
- Relatively high degree of price stability
- Above-average yield potential of non-governmental bonds
- Sustainability aspects are taken into account by the fund management
- Broad diversification across numerous securities
- Possible extra returns through single security analysis and active management

Risks

- Money market rates vary
- Price declines cannot be ruled out
- Above-average price fluctuations of nongovernmental bonds
- Sustainability approach narrows the investment universe
- Limited participation in the yield potential of single securities
- Success of single security analysis and active management not guaranteed

Passive Equity Market Exposure by HSBC

HSBC Asset Management

Index-Tracking

HSBC MSCI World UCITS ETF

ESMA Rating: 6
Investment Style: Passive
Morningstar Rating*: ★★★★
ISIN: IE000UQND7H4

Fund objectives

- The Fund aims to track as closely as possible the returns of the MSCI World Index (the "Index"). The Fund will invest in or gain exposure to shares of companies which make up the Index.
- The Index is made up of large and mid-cap companies of the world's developed countries, as determined by the Index provider.
- The Fund will be passively managed and will utilise an investment technique called optimisation. This technique seeks to minimise the difference in return between the Fund and the Index by taking into account tracking error and trading costs when constructing a portfolio.

HSBC S&P 500 UCITS ETF

ESMA Rating: 6
Investment Style: Passive
Morningstar Rating*: ★★★★
ISIN: IE000JZ473P7

Fund objectives

- The Fund aims to track as closely as possible the returns of the S&P 500 Index (the "Index"). The Fund will invest in or gain exposure to shares of companies which make up the Index.
- The Index is made up of large-sized stock market listed companies in the US.
- The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index.

* as at 30/06/26

Index-Tracking

(continued)

HSBC Euro Stoxx 50 UCITS ETF

ESMA Rating: 6
Investment Style: Passive
Morningstar Rating*: ★★★★
ISIN: IE000MWUQBJ0

Fund objectives

- The Fund aims to track as closely as possible the returns of the EURO STOXX 50 Index (the "Index"). The Fund will invest in or gain exposure to shares of companies which make up the Index.
- The Index is made up of the 50 largest stock market listed companies in the European Monetary Union.
- The Fund will be passively managed and will aim to invest in the shares of the companies in generally the same proportion as in the Index.

Information & charges

Clear and Transparent Charges

At Allianz Global Life, we believe in building trust by ensuring that what you see is what you get. Everything is presented upfront, with no surprises or hidden fees.

Pricing

Our funds offer complete transparency as they are not wrapped within an insurance fund. This approach offers clear, straightforward costs, transparent asset management, and it limits conflicts of interest. The costs we mention are the actual, effective costs. So, as an intermediary, you always know exactly what the client is paying. For Allianz Vantage PRSA product charges and commission summary, please refer to the Charging Structure document which is available on the Advisor Portal.

Annual Management Charge (AMC)

The Annual Management Charge (AMC) is a yearly fee, deducted monthly, to cover the setup, management, and ongoing service of a policy and investments. The AMC varies based on the chosen product version and the policy's value, calculated as a percentage of that value.

Guarantee Charge

The Guarantee Charge is a yearly fee, deducted monthly and calculated as a percentage of the fund to which the guarantee applies. It covers the cost of the guarantee which applies to some of our range of fund. The Guarantee Charge only applies if the client has selected one of the relevant funds, and they have chosen to select the guarantee. The Guarantee Charge varies by fund.

Fund Management Charge (FMC)

The Fund Management Charge is the annual cost of each external fund and it depends on which funds your policy is invested. It is determined by the Investment Manager and it is shown in the relevant factsheet. For some funds, the FMC may be higher or lower.

Sustainability

As a part of the Allianz Group, we believe sustainability is a driver for long-term growth and success for our business.
