Date of birth	25 Oct 1960

Issued 01 Oct 2026

Your personal illustration for a Synergy Approved Retirement Fund

In summary

1 What you could get back after 20 years

	at 3.2% growth	at 6% growth
Projected value	**€36,716.36**	**€276,490.46**
Projected withdrawals	**€574,952.30**	**€612,514.44**

These values are before tax.
*For more detail, see **What you could get back***

2 Premiums and withdrawals

Single premium **€500,000.00**

You have chosen to withdraw 5% per annum of your policy payable yearly.

*For more detail, see **Premiums and withdrawals***

3 Investment information

Standard Life Dimensional World Allocation 80/20 (100.00%)

*For more detail, see **Investment information***

4 What your policy could cost

The effect of charges on your projected value is equivalent to reducing the growth rate by 1.2%

*For more detail, see **Information on charges***

Warning: These figures are estimates only. They are not a reliable guide to the future performance of your investment.

Withdrawals

The projected withdrawal figures are in addition to your projected value. You will have received them throughout the term. For more detail on withdrawals see Premiums and withdrawals.

This illustration must be read with your Key features document (SYARFKF1) and your Investment Options guide (SYIO1).

Wherever you see this symbol you can find an explanation in Glossary.

The detail

1 What you could get back

Year	A Total amount of premiums paid	B Projected investment growth	C Projected expenses and charges	D Projected additional charges if surrendered	E Projected withdrawals made (before tax)	F = (A+B-C-D-E) Projected value (before tax)
1	€500,000.00	€15,253.20	€5,569.33	€19,383.79	€25,089.19	€465,210.88
2	€500,000.00	€30,043.58	€10,969.70	€18,735.75	€50,680.17	€449,657.96
3	€500,000.00	€44,264.72	€16,162.23	€13,539.59	€76,782.96	€437,779.95
4	€500,000.00	€57,929.00	€21,151.43	€8,667.40	€103,407.81	€424,702.37
5	€500,000.00	€71,008.29	€25,927.03	€4,145.16	€130,565.16	€410,370.94
10	€500,000.00	€126,643.69	€46,241.03	€0.00	€274,719.64	€305,683.02
15	€500,000.00	€162,844.14	€59,458.80	€0.00	€433,877.84	€169,507.50
20	€500,000.00	€175,879.30	€64,210.65	€0.00	€574,952.30	€36,716.36

- We will apply an imputed distribution to your ARF or vested PRSA in December each year of:
- 4%, if you are 60 years of age or over for the full tax year, or
- 5%, if you are 70 years of age or over for the full tax year, or
- 6%, if you have combined ARF and vested PRSA assets of €2 million or more, and are aged 60 or over for the full tax year.
- Actual distributions from your ARF or vested PRSA made during the year will reduce the imputed distribution withdrawal amount payable in December. The projected values above assume the appropriate imputed distribution is deducted throughout the lifetime of the policy. See your Key features document (SYARFKF1) for more detail.
- When making withdrawals from your ARF, your policy may reduce until there is no value. This can happen when investment returns are poor and/or when a high level of withdrawal is chosen.
- In the illustration above the withdrawal due to occur on 6 December 2045 would have brought the value of your policy below the minimum balance required to keep your policy open (currently €2,500). After this date, for the purpose of this illustration only, withdrawals of only the annual imputed distribution will continue.
- If you were to cash in this policy within the first 5 years of a premium being allocated, an early encashment charge* will apply, see your Key features document (SYARFKF1) for more detail. This is allowed for in the table above.
- The expenses and charges have the effect of reducing the investment return by 1.2% each year.

IMPORTANT

THIS ILLUSTRATION ASSUMES A RETURN OF 3.20% PER ANNUM. THIS RATE IS FOR ILLUSTRATIVE PURPOSES ONLY AND IS NOT GUARANTEED.

ACTUAL INVESTMENT GROWTH WILL DEPEND ON THE PERFORMANCE OF THE UNDERLYING INVESTMENTS AND MAY BE MORE OR LESS THAN ILLUSTRATED.

ACTUAL INVESTMENT GROWTH WILL DEPEND ON THE PERFORMANCE OF THE UNDERLYING INVESTMENTS AND MAY BE MORE OR LESS THAN ILLUSTRATED.

2 Premiums and withdrawals

Payment type	Payment amount
Single premium	€500,000.00

- The allocation rate* for your single premium of €500,000.00, payable on 1 October 2026, is 100%.
- The investment term is open ended. For the purposes of this illustration, we have assumed that it is 20 years.

Withdrawals

- You have chosen to make a regular withdrawal of 5% per annum of your policy before tax. This is payable yearly from 6 December 2026.
- For the purposes of this illustration your withdrawal is converted into a monetary amount the first time it's deducted. This amount is then increased by 2% each year.

3 Investment information

Your investment choice	Percentage invested
Standard Life Dimensional World Allocation 80/20	100.00%

4 Information on charges

- The charges outlined below are based on your investment choice.
- If you change your investment choice, the charges and/or costs deducted by Standard Life and third parties may differ.

Fund charges

Funds	Annual management charge
Standard Life Dimensional World Allocation 80/20	1.15%

ⓘ Charges are collected daily

- The annual management charges* shown above will be reduced by 0.25% per annum. Your policy is credited each month to achieve this. The credit will depend on the value of your total investment at that time.

Further information on charges

- We'll deduct a fund based charge* every month. The total each year will be 0.25%.

4 Information on charges - continued

ILLUSTRATIVE TABLE OF INTERMEDIARY REMUNERATION AND SALES REMUNERATION

Assumed investment growth of 3.2%

Year	Premiums payable in that year	Projected total intermediary and sales remuneration payable in that year
1	€500,000.00	€16,160.17
2	€0.00	€1,174.57
3	€0.00	€1,132.68
4	€0.00	€1,088.60
5	€0.00	€1,042.30
10	€0.00	€774.83
15	€0.00	€439.95
20	€0.00	€91.99

ⓘ This remuneration is paid for from the charges we deduct

* Glossary

Allocation rate - is the amount of your premium which will be invested.

Annual management charge - we deduct this daily from each fund when calculating the fund price.

Early encashment charge - applies for the first 5 years of each investment.

Fund based charge - a percentage of your policy's value.
