**Re: Your Allianz Vantage ARF (A5) quotation**

Dear Mr Murphy,

Thank you for the opportunity to discuss how to invest your retirement fund and draw an income from it. As agreed, please find enclosed your personalised quotation for the Allianz Vantage ARF (A5). Our Statement of Suitability explains why we believe this recommendation is suitable for you.

Enclosed:

- Statement of Suitability, setting out our recommendation and the reasons for it
- A one-page summary of your quotation
- Projected benefits, showing how your policy could perform
- Details of the charges that apply
- Details of your investment and its risk
- A statement of the remuneration we receive
- Information about the product, tax and other important points

## Next steps

Please read the enclosed documents carefully, in particular the projected benefits, the charges and the important information. If you would like to go ahead, let me know and I will arrange the application with you. The figures in this quotation may change if your circumstances or the contributions change, so please contact me before proceeding if anything is different.

If you have any questions, please contact me on 01 555 0000 or at pat@test.ie.

Yours sincerely,

Pat Adviser
Test Financial Ltd

# Statement of Suitability

| | | | |
|---|---|---|---|
| Client | Alex Murphy | Adviser | Pat Adviser |
| Date | 8 October 2026 | Firm | Test Financial Ltd |
| Product | Allianz Vantage ARF (A5) | Quote ref. | Q-261008-ENDG |

## Your needs and objectives

You have told us that you wish to invest your retirement savings in an Approved Retirement Fund and draw an income from it, starting from age 67. The client confirmed this in our meeting.

## Your personal and financial circumstances

The client confirmed this in our meeting.

## Your attitude to risk

Based on the risk profiling we carried out with you, your attitude to investment risk corresponds to a risk rating of 4 (Medium) on the 1 to 7 Summary Risk Indicator scale. The client confirmed this in our meeting.

## Our recommendation

We recommend the Allianz Vantage ARF (A5), with a single contribution of €300,000, invested in a selection of funds chosen to suit your needs. Based on the weighted average of its funds' published SRIs, this portfolio has an indicative risk rating of about 3 (Low to Medium). This is lower than your assessed attitude to risk. We have recommended it because: Client prefers a lower-risk portfolio for income stability.

## Why we believe this is suitable for you

- An ARF allows you to keep your retirement savings invested while drawing a flexible income, and to pass any remaining value to your estate.
- The client confirmed this in our meeting.
- The client confirmed this in our meeting.

## Sustainability of your income

At 5.00% growth, your fund is projected to run out in year 24 (around age 89), at which point your policy will end. At 3.20% growth, your fund is projected to run out in year 20 (around age 85), at which point your policy will end. You have chosen an initial income of €15,000 per annum, escalating at 2.00% per annum. If this income is lower than the Revenue deemed distribution requirements at any point, this illustration assumes the higher amount is taken.

## Charges and remuneration

Allowing for all charges, the assumed growth rate of 5.00% is reduced to 3.14% per annum. We will receive initial remuneration of €12,000 and trail remuneration of 0.25% a year of your fund value, paid by Allianz Global Life from its charges. Full details are set out in the Charges section and the Remuneration Statement in this pack.

## Risks you should be aware of

The value of your ARF may go down as well as up and is not guaranteed. Depending on the income you take and investment returns, your fund could run out during your lifetime. The client confirmed this in our meeting.

## Alternatives considered

The client confirmed this in our meeting.

I confirm that this Statement of Suitability reflects the advice given to the client.

# Your personalised quotation

# Allianz Vantage ARF (A5)

Prepared for Alex Murphy by Test Financial Ltd

This page summarises the key details of your quotation. Each item is explained in more detail later in this document.

### 1 Your plan

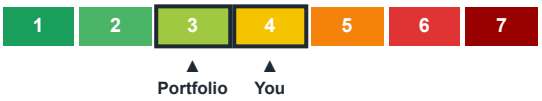

**Allianz Vantage ARF (A5)**
Start date 01/10/2026
Income from age 67

### 2 Your contribution

Single contribution €300,000
Income €15,000 a year, increasing 2.00% a year

### 3 Your investment and risk

**Your own fund selection**
Your risk rating: **4 – Medium**
Indicative portfolio risk: **3 – Low to Medium***

### 4 Your fund over time

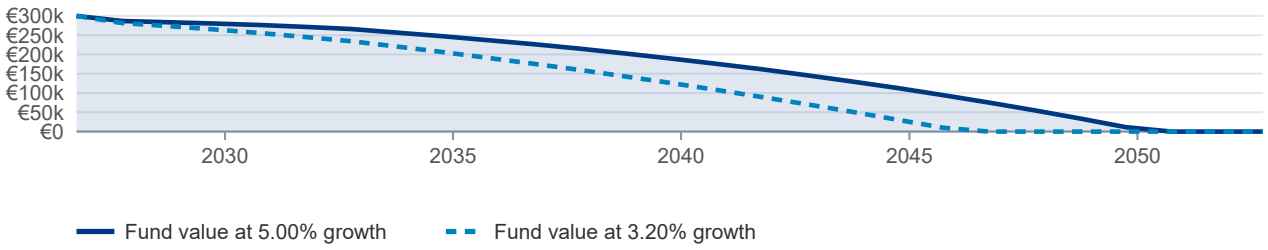

At 5.00%: lasts until around age **89**
At 3.20%: lasts until around age **85**

### 5 Charges

Total annual charge 1.81%
Growth reduced from 5.00% to 3.14%

### 6 Adviser remuneration

Initial €12,000
Trail 0.25% a year of fund value

### In this pack

- Cover letter
- Statement of Suitability
- Projected benefits
- Charges
- Your investment and risk
- Remuneration statement
- About the product
- Tax information
- Important information
- Glossary

### Key warnings

**Warning: The value of your investment may go down as well as up.**
**Warning: If you invest in this product you may lose some or all of the money you invest.**
**Warning: The income you get from this investment may go down as well as up.**
**Warning: Past performance is not a reliable guide to future performance.**
**Warning: This product may be affected by changes in currency exchange rates.**

* Indicative portfolio risk is the allocation-weighted average of the published SRIs of the funds (3.2), rounded to the nearest whole number. It is a guide only. It is not an official Summary Risk Indicator, and it does not allow for the effect of diversification between funds. This quotation is for illustration purposes only and does not form part of a contract. Figures are not guaranteed.

## Projected benefits

The tables below show how your ARF could perform at two different assumed rates of investment growth, allowing for the income you take and all charges. Column E shows the projected value of your ARF after income.

### At 5.00% growth a year

| | | A | B | C | D | E = A + B − C − D |
|---|---|---|---|---|---|---|
| Year | Age | Contributions paid | Investment growth to date | Charges to date | Income taken to date | Projected value after income |
| 1 | 67 | €300,000 | €14,798 | €20,594 | €7,500 | **€286,704** |
| 2 | 68 | €300,000 | €29,417 | €22,769 | €22,800 | **€283,848** |
| 3 | 69 | €300,000 | €43,724 | €24,936 | €38,406 | **€280,383** |
| 4 | 70 | €300,000 | €57,697 | €27,099 | €54,324 | **€276,273** |
| 5 | 71 | €300,000 | €71,308 | €29,266 | €70,561 | **€271,481** |
| 10 | 76 | €300,000 | €132,951 | €49,453 | €156,746 | **€226,752** |
| 15 | 81 | €300,000 | €180,953 | €67,308 | €251,901 | **€161,744** |
| 20 | 86 | €300,000 | €210,573 | €78,326 | €356,961 | **€75,287** |
| **24** | **90** | **€300,000** | **€217,318** | **€80,835** | **€436,483** | **€0** |

**IMPORTANT**

**THESE ILLUSTRATIONS ASSUME A RETURN OF 5.00% PER ANNUM. THIS RATE IS FOR ILLUSTRATION PURPOSES ONLY AND IS NOT GUARANTEED. ACTUAL INVESTMENT GROWTH WILL DEPEND ON THE PERFORMANCE OF THE UNDERLYING INVESTMENTS AND MAY BE MORE OR LESS THAN ILLUSTRATED.**

The deductions for charges shown in column C have the same effect as reducing the assumed investment growth from 5.00% to 3.14%. The income figures in column D and the policy value figures in column E are shown gross of tax.

At 5.00% growth, your fund is projected to run out in year 24 (around age 89), at which point your policy will end.

## At 3.20% growth a year

| | | A | B | C | D | E = A + B − C − D |
|---|---|---|---|---|---|---|
| Year | Age | Contributions paid | Investment growth to date | Charges to date | Income taken to date | Projected value after income |
| 1 | 67 | €300,000 | €9,471 | €20,282 | €7,500 | **€281,688** |
| 2 | 68 | €300,000 | €18,658 | €22,155 | €22,800 | **€273,704** |
| 3 | 69 | €300,000 | €27,480 | €24,030 | €38,406 | **€265,044** |
| 4 | 70 | €300,000 | €35,920 | €25,913 | €54,324 | **€255,682** |
| 5 | 71 | €300,000 | €43,964 | €27,811 | €70,561 | **€245,592** |
| 10 | 76 | €300,000 | €77,681 | €44,757 | €156,746 | **€176,179** |
| 15 | 81 | €300,000 | €98,981 | €57,029 | €251,901 | **€90,051** |
| **20** | **86** | **€300,000** | **€105,562** | **€60,821** | **€344,742** | **€0** |

**IMPORTANT**

**THESE ILLUSTRATIONS ASSUME A RETURN OF 3.20% PER ANNUM. THIS RATE IS FOR ILLUSTRATION PURPOSES ONLY AND IS NOT GUARANTEED. ACTUAL INVESTMENT GROWTH WILL DEPEND ON THE PERFORMANCE OF THE UNDERLYING INVESTMENTS AND MAY BE MORE OR LESS THAN ILLUSTRATED.**

The deductions for charges shown in column C have the same effect as reducing the assumed investment growth from 3.20% to 1.36%. The income figures in column D and the policy value figures in column E are shown gross of tax.

At 3.20% growth, your fund is projected to run out in year 20 (around age 85), at which point your policy will end.

You have chosen an initial income of €15,000 per annum, escalating at 2.00% per annum. If this income is lower than the Revenue deemed distribution requirements at any point, this illustration assumes the higher amount is taken.

This illustration assumes that the income you receive will escalate by 2.00% per annum. There is no obligation on you to take income levels that increase in this way.

Where amounts are withdrawn from your ARF, its value will reduce and could run out, particularly if a high level of income is taken, investment returns are poor or you live a long time.

The charges shown in column C for the early years assume that the policy is fully encashed and an exit charge is incurred. No exit charge applies to partial withdrawals or regular income. If the policy is not fully encashed during the exit charge period, no exit charge is payable and the charges actually deducted are lower than shown.

# Charges

The charges below are deducted on a monthly basis, either directly from your policy or indirectly from the funds in which it invests.

An annual policy charge of 1.10% and a fund management charge, which varies by fund, apply to your ARF. Where you have chosen the optional rolling guarantee, a guarantee charge also applies.

| Fund | Allocation | Policy charge | Fund charge | Guarantee charge | Total annual charge |
|---|---|---|---|---|---|
| Allianz Advanced Fixed Income Euro | 40.0% | 1.10% | 0.27% | – | 1.37% |
| Allianz Strategy Select 50 | 60.0% | 1.10% | 0.25% | 0.75% | 2.10% |
| **Your portfolio** | **100%** | **1.10%** | **0.26%** | **0.45%** | **1.81%** |

## Exit charges

An exit charge applies if you fully encash your ARF in the early years, as shown below. No exit charge applies to income payments or partial withdrawals.

| Policy year | 1 | 2 | 3 | 4 | 5 | 6+ |
|---|---|---|---|---|---|---|
| Exit charge | 5.00% | 4.00% | 3.00% | 2.00% | 1.00% | 0.00% |

## Effect of charges

At 5.00% growth, the total effect of charges is equivalent to reducing the assumed growth rate to 3.14% per annum. At 3.20% growth, the total effect of charges is equivalent to reducing the assumed growth rate to 1.36% per annum. The Reduction in Yield is higher than the annual charge because it accounts for all fees combined and their compounding effect on your fund over time.

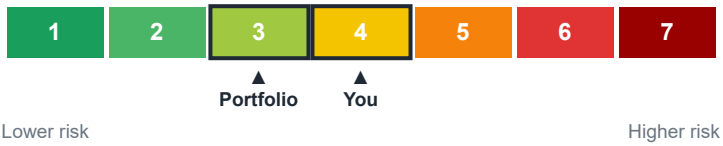

Where you have chosen the optional guarantee on a fund, the projections assume the guarantee remains in place throughout. If you switch it off in the future, total charges will be lower than shown.

The illustration uses the current level of fund management charges, which may vary in the future. Further details are available in the Schedule of Fees and Charges.

## Your investment and risk

Each fund has a published Summary Risk Indicator (SRI) from 1 (lower risk, typically lower rewards) to 7 (higher risk, typically higher rewards). Your own risk rating comes from the risk profiling your adviser carried out with you. To compare the two, we show an indicative risk figure for your portfolio, worked out as the weighted average of its funds' SRIs. Glidepath strategies change their fund mix as you approach retirement, so they are matched to you on their risk profile instead.

Your risk rating: **4 – Medium**
Indicative portfolio risk: **3 – Low to Medium***

The indicative risk of your portfolio (3) is lower than your assessed attitude to risk (4). Your adviser has recorded the reason for this recommendation: Client prefers a lower-risk portfolio for income stability.

* Indicative portfolio risk is the allocation-weighted average of the published SRIs of the funds (3.2), rounded to the nearest whole number. It is a guide only. It is not an official Summary Risk Indicator, and it does not allow for the effect of diversification between funds.

### Your own fund selection

You have chosen your own selection of funds.

Fixed Income & Cash 40.0% Multi-Asset 60.0% Equity 0.0%

| Fund | Allocation | Risk (SRI) | Guarantee |
|---|---|---|---|
| **Fixed Income & Cash** | | | |
| Allianz Advanced Fixed Income Euro | 40.0% | SRI 2 | – |
| **Multi-Asset** | | | |
| Allianz Strategy Select 50 | 60.0% | SRI 4 | Yes |

**Allianz Advanced Fixed Income Euro.** A bond fund investing primarily in euro-denominated investment-grade fixed income securities across a range of maturities.

**Allianz Strategy Select 50.** A balanced multi-asset fund with approximately equal allocations to global equities and fixed income. Aims to deliver medium-term capital growth. Optional rolling guarantee available.

The optional rolling guarantee protects a percentage of your fund value against falls in the guaranteed fund, in return for an additional charge. Full terms are set out in the product terms and conditions.

# Remuneration statement

This statement sets out the remuneration we pay to your financial adviser, Test Financial Ltd, in connection with this policy. This remuneration is paid for by us from the charges we make on your policy; it is not an additional charge.

| Type | Basis | Amount |
|---|---|---|
| Initial | 4.00% of single contribution | €12,000 |
| Trail | 0.25% a year of fund value | €11,094 at 5.00%<br>€8,346 at 3.20%<br>projected total over the life of your ARF |

Initial remuneration is a once-off payment made when your policy starts. Trail (ongoing) remuneration is paid each year as a percentage of your fund value, so the amount depends on future investment returns.

## Projected remuneration by year

| Year | Contributions payable in that year | Projected remuneration at 5.00% | Projected remuneration at 3.20% |
|---|---|---|---|
| 1 | €300,000 | €12,758 | €12,751 |
| 2 | – | €748 | €728 |
| 3 | – | €732 | €699 |
| 4 | – | €715 | €668 |
| 5 | – | €696 | €637 |
| 10 | – | €581 | €460 |
| 15 | – | €423 | €249 |
| 20 | – | €213 | €5 |
| 25 | – | €0 | €0 |

Projected remuneration figures assume the growth rate(s) shown in this quotation and are not guaranteed.

## Clawback

Commission clawback applies on cool-off only (within 30 days of policy inception) — no clawback applies on surrender.

## About the product

- An Approved Retirement Fund (ARF) is a personal investment fund that you can use at retirement to hold your pension savings and draw an income from them, while your fund remains invested.
- You keep ownership and control of your fund. You choose how it is invested and how much income you take, subject to the Revenue deemed distribution rules.
- The value of your ARF is not guaranteed and will depend on investment performance and the amount of income you take. Your fund could run out during your lifetime.
- On death, the value of your ARF passes to your estate. Where it passes to a surviving spouse or civil partner it may be transferred into an ARF in their name.
- You can choose an optional rolling guarantee on certain funds, which protects part of your fund value in return for an additional charge.

## Tax information

The information below is based on our understanding of current Irish tax law and Revenue practice, which may change. It is a general summary only; your adviser can explain how it applies to your circumstances.

- Investment growth within your ARF is free of income tax and capital gains tax while it remains invested.
- Withdrawals from your ARF are taxed as income under PAYE, and are subject to USC and, where applicable, PRSI.
- Revenue deemed distribution rules require tax to be paid on a minimum withdrawal each year from the year in which you turn 61: 4% of the fund value from age 61, increasing to 5% from age 71. Where the total value of your ARFs exceeds €2 million, the rate is 6%. Tax is due on this amount whether or not you actually withdraw it.
- On death, the tax treatment of your ARF depends on who inherits it. Transfers to a surviving spouse or civil partner's ARF are free of income tax; other beneficiaries may be liable to income tax and/or capital acquisitions tax.

## Important information

**Warning: The value of your investment may go down as well as up.**

**Warning: If you invest in this product you may lose some or all of the money you invest.**

**Warning: The income you get from this investment may go down as well as up.**

**Warning: Past performance is not a reliable guide to future performance.**

**Warning: This product may be affected by changes in currency exchange rates.**

This quotation is based on the details provided by your adviser and the assumptions set out in this document. It does not form part of your contract. The terms and conditions of your policy will be set out in your policy documents.

The figures in this quotation are illustrations only and are not guaranteed. The actual value of your policy will depend on the performance of the underlying funds, the contributions paid, the income taken and the charges applied.

You will receive the regulatory disclosure documents required for this product (including a Point of Sale and Point of Issue Disclosure) before or when your policy starts. If there is any difference between this quotation and those documents, the regulatory documents apply.

It is recommended that you seek independent financial advice before making any decision about your retirement savings.

### Cooling-off period

You have the right to cancel your policy within 30 days of being informed that it has started. To cancel, write to us at Operations Department, Allianz Global Life, Maple House, Temple Road, Blackrock, Co. Dublin, A94 Y9E8, or email customersupport@allianzgloballife.ie. Any contributions paid will be refunded, less a deduction for any fall in value between the time the money was invested and the time your instruction to cancel is received.

This quotation is based on charges, fund options and assumptions in place on 8 October 2026.

Allianz Global Life dac is regulated by the Central Bank of Ireland. Registered in Dublin, Ireland. Company Reg. No.: 458565.
Directors: Caroline Schwarzer (Chair); Giampaolo Viseri (CEO); Michele Bricchi; Mary Fulton; Robert Scannell; Kai Wallbaum; Rebecca Wysocki.

## Glossary

| | |
|---|---|
| **Annual Management Charge (AMC)** | A yearly charge, expressed as a percentage of your fund value, for administering your policy. |
| **Annuity** | A regular income for life bought with your pension fund at retirement. |
| **Approved Retirement Fund (ARF)** | A personal investment fund used to hold pension savings after retirement and draw an income from them. |
| **Clawback** | The return of remuneration by the adviser to the provider if the policy is cancelled or transferred within a set period. |
| **Deemed disposal** | A Revenue rule that taxes the gain on an Investment Bond every 8 years, whether or not a withdrawal is made. |
| **Deemed distribution** | A Revenue rule that treats a minimum percentage of your ARF as withdrawn each year for tax purposes from age 61. |
| **Exit charge** | A charge that applies if the policy is fully encashed during the early years. |
| **Exit tax** | The tax deducted from an Investment Bond on a chargeable event, at a rate depending on the policyholder type. |
| **Fund Management Charge (FMC)** | A yearly charge made by the fund manager, reflected in the price of the fund. |
| **Glidepath** | An investment strategy that automatically moves your fund into lower-risk funds as you approach retirement. |
| **Government levy** | A 1% tax on life assurance premiums, including contributions to an Investment Bond, collected by the insurer on behalf of the State. |
| **Inflation** | The general increase in prices over time, which reduces the buying power of money. |
| **Initial remuneration** | A once-off payment to your adviser when your policy starts. |
| **Investment Bond** | A unit-linked investment product for medium to long term growth, taxed under the gross roll-up basis. |
| **PRSA** | Personal Retirement Savings Account — a flexible personal pension contract. |
| **Reduction in yield** | A single figure showing the total effect of all charges on your projected investment return. |
| **Retirement lump sum** | The part of your pension fund you can take as a lump sum at retirement, up to Revenue limits. |

| | |
|---|---|
| **Rolling guarantee** | An optional feature on certain funds that protects a percentage of your fund value, for an additional charge. |
| **Summary Risk Indicator (SRI)** | A rating from 1 (lower risk) to 7 (higher risk) showing the level of risk of a fund. |
| **Trail remuneration** | An ongoing payment to your adviser, calculated as a percentage of your fund value each year. |
| **Transfer value** | The value of benefits moved into your policy from another pension arrangement. |
