Statement of Suitability

Client	Alex Murphy	Adviser	Pat Adviser
Date	20 October 2026	Firm	Test Financial Ltd
Product	Allianz Vantage Non-Standard PRSA (A5)		

Your needs and objectives

You have told us that you wish to save for your retirement and plan to retire at age 65.

Your personal and financial circumstances

If your income stopped, you could cover your normal spending for 12 months or more from savings you can get at easily. If this investment lost a large part of its value, it would have little or no impact on your finances, as you have other savings and income to rely on. You plan to hold this investment for 5 years or more.

Your attitude to risk

Based on the risk profiling we carried out with you (Allianz Global Life Risk Profiler, 20/10/2026), your attitude to investment risk corresponds to a risk rating of 4 (Medium) on the 1 to 7 ESMA risk scale. In the risk profiler you told us that the largest fall in value over 12 months you could accept is 25% (€2,500 on €10,000), that if your investment fell by 20% you would keep it and invest more, and that you want strong growth over the long term, accepting large rises and falls in value. Together these give an attitude to risk of 5 (Medium to High). Your capacity for loss was assessed as high. This gives a risk rating of 5 (Medium to High). Your investment knowledge and experience was assessed as high. The risk profiler gave a risk rating of 5. Following our discussion, we have agreed a lower risk rating of 4 because: Wants a more cautious approach for now.

Your sustainability preferences

You told us that you would like your investment to include investments that take account of their main negative effects on the environment and society. The negative effects that matter most to you are greenhouse gas emissions and energy use. All of the recommended funds are classified under Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR), which means they promote environmental or social characteristics.

Our recommendation

We recommend the Allianz Vantage Non-Standard PRSA (A5), with a single contribution of €50,000, invested in a selection of funds chosen to suit your needs. Based on the weighted average of its funds' published ESMA ratings, this portfolio has an indicative risk rating of about 4 (Medium). This is in line with your attitude to risk.

Why we believe this is suitable for you

- A PRSA allows you to save for retirement in a tax-efficient way, with tax relief on contributions within Revenue limits.

Charges and remuneration

The total effect of the charges on your plan is equivalent to reducing the assumed growth rate by 1.46% per annum. We will receive initial remuneration of €2,000 and trail remuneration of 0.25% a year of your fund value, paid by Allianz Global Life from its charges. Full details are set out in the Charges section and the Remuneration Statement in this pack.

Risks you should be aware of

The value of your PRSA may go down as well as up and is not guaranteed. The benefits you receive will depend on the contributions paid, investment performance, charges and annuity rates at retirement.

Your own risk rating comes from the risk profiling your adviser carried out with you, and is compared below with the indicative risk of your portfolio. Glidepath strategies change their fund mix as you approach retirement, so they are matched to you on their risk profile instead.

The risk of your portfolio is in line with your assessed attitude to risk.

* Indicative portfolio risk is the allocation-weighted average of the published ESMA ratings of the funds (4.0), rounded to the nearest whole number. It is a guide only. It is not an official ESMA risk rating, and it does not allow for the effect of diversification between funds.
