Statement of Suitability

Client	Jordan Byrne	Adviser	Pat Adviser
Date	16 October 2026	Firm	Test Financial Ltd
Product	Allianz Vantage Investment Bond (K1)		

Your needs and objectives

You have told us that you wish to invest regular contributions of €500 a month over the medium to long term.

Your attitude to risk

Based on the risk profiling we carried out with you, your attitude to investment risk corresponds to a risk rating of 3 (Low to Medium) on the 1 to 7 ESMA risk scale.

Your sustainability preferences

You told us that you have sustainability preferences. All of the recommended funds are classified under Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR), which means they promote environmental or social characteristics.

Our recommendation

We recommend the Allianz Vantage Investment Bond (K1), with regular contributions of €500 a month, invested in a selection of funds chosen to suit your needs. Based on the weighted average of its funds' published ESMA ratings, this portfolio has an indicative risk rating of about 3 (Low to Medium). This is in line with your attitude to risk.

Why we believe this is suitable for you

- An Investment Bond allows you to invest a lump sum (and, where available, regular contributions) across a range of funds within a single policy.

Sustainability of your fund

At 4.50% growth, your fund is not projected to run out within 40 years. You have not chosen to take an income from this policy, so it is left to grow.

Charges, tax and remuneration

Allowing for all charges, the assumed growth rate of 4.50% is reduced to 3.34% per annum. Exit tax of 38.00% applies, based on a individual policyholder. We will receive initial remuneration of €600, paid by Allianz Global Life from its charges. Full details are set out in the Charges section and the Remuneration Statement in this pack.

Risks you should be aware of

The value of your Investment Bond may go down as well as up and is not guaranteed. Depending on any income or withdrawals you take and investment returns, your fund could run out.

IMPORTANT

THESE ILLUSTRATIONS ASSUME A RETURN OF 4.50% PER ANNUM. THIS RATE IS FOR ILLUSTRATION PURPOSES ONLY AND IS NOT GUARANTEED. ACTUAL INVESTMENT GROWTH WILL DEPEND ON THE PERFORMANCE OF THE UNDERLYING INVESTMENTS AND MAY BE MORE OR LESS THAN ILLUSTRATED.

The deductions for charges shown in column C have the same effect as reducing the assumed investment growth from 4.50% to 3.34%. Column D shows the exit tax that would be due if the policy were fully encashed at that point; no tax is actually deducted unless a chargeable event occurs.

At 4.50% growth, your fund is not projected to run out within 40 years.

You have not chosen to take an income from this policy, so it is left to grow.

This illustration assumes a individual policyholder, with exit tax of 38.00% applying to chargeable events, including the Revenue "deemed disposal" rule which taxes the gain on your policy every 8 years whether or not you make a withdrawal.

Where amounts are withdrawn from your Investment Bond, its value will reduce and could run out, particularly if a high level of income is taken, investment returns are poor or you live a long time.

The charges shown in column C for the early years assume that the policy is fully encashed and an exit charge is incurred. No exit charge applies to the regular, scheduled withdrawals described in this quotation. If the policy is not fully encashed during the exit charge period, no exit charge is payable and the charges actually deducted are lower than shown.

Allianz Global Life dac is regulated by the Central Bank of Ireland.
