Your needs and objectives

You have told us that you wish to save for your retirement and plan to retire at age 65. Discussed in our meeting.

Your personal and financial circumstances

You are an employee. Nobody depends on you financially. Your gross annual income is over €100,000. You have no regular financial commitments. You hold over €150,000 in liquid assets. You plan to keep this investment for more than 10 years. Discussed in our meeting.

Your attitude to risk

Based on the risk profiling we carried out with you (Allianz Global Life Risk Profiler, 13/10/2026), your attitude to investment risk corresponds to a risk rating of 5 (Medium to High) on the 1 to 7 Summary Risk Indicator scale. In the risk profiler you told us that, if your investments fell in value, you would hold the investment and wait, because you want a positive long-term return. Your financial capacity to take on investment risk was assessed as high. Together these give a risk profile of 5 (Medium to High) on the 1 to 7 scale. Your experience and knowledge of investment products was assessed as high, which means you have good knowledge or experience of investment products. Discussed in our meeting.

Your sustainability preferences

You told us that you have sustainability preferences. All of the recommended funds are classified under Article 8 of the EU Sustainable Finance Disclosure Regulation (SFDR), which means they promote environmental or social characteristics.

Our recommendation

We recommend the Allianz Vantage Non-Standard PRSA (A5), with a single contribution of €50,000, invested in a selection of funds chosen to suit your needs. Based on the weighted average of its funds' published SRIs, this portfolio has an indicative risk rating of about 5 (Medium to High). This is in line with your attitude to risk.

Why we believe this is suitable for you

- A PRSA allows you to save for retirement in a tax-efficient way, with tax relief on contributions within Revenue limits.
- Discussed in our meeting.
- Discussed in our meeting.

Charges and remuneration

The total effect of the charges on your plan is equivalent to reducing the assumed growth rate by 1.47% per annum. We will receive initial remuneration of €2,000 and trail remuneration of 0.25% a year of your fund value, paid by Allianz Global Life from its charges. Full details are set out in the Charges section and the Remuneration Statement in this pack.

Risks you should be aware of

The value of your PRSA may go down as well as up and is not guaranteed. The benefits you receive will depend on the contributions paid, investment performance, charges and annuity rates at retirement. Discussed in our meeting.

Each fund has a published Summary Risk Indicator (SRI) from 1 (lower risk, typically lower rewards) to 7 (higher risk, typically higher rewards). Your own risk rating comes from the risk profiling your adviser carried out with you. To compare the two, we show an indicative risk figure for your portfolio, worked out as the weighted average of its funds' SRIs. Glidepath strategies change their fund mix as you approach retirement, so they are matched to you on their risk profile instead.

The risk of your portfolio is in line with your assessed attitude to risk.

* Indicative portfolio risk is the allocation-weighted average of the published SRIs of the funds (5.0), rounded to the nearest whole number. It is a guide only. It is not an official Summary Risk Indicator, and it does not allow for the effect of diversification between funds.
